

TEST

1. Types of Mediums:

* Wired = Copper cable and Fiber cable.

Copper cable - Electric signal

Fiber cable - Light signal.

* Wireless - Data transfer into Radio Frequency.

2. Switch & Pins:

1. + T

2. - T

3. + R

4. + V

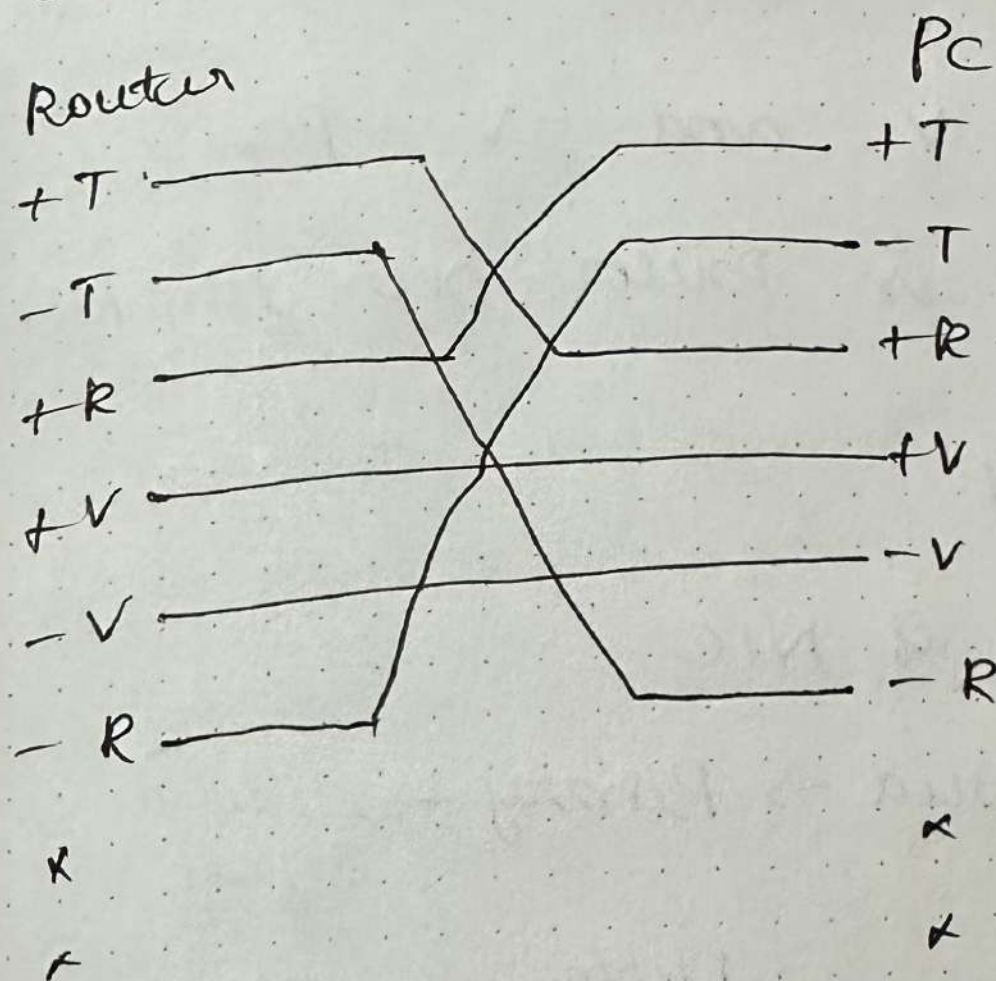

5. - V

6. - R

7. x

8. x

2. Connecting between Cables.

Same Function = Cross Cables.

4. Auto MDIX.

When 2 Network Devices are Same Function or Different Function we can use Straight or/and Cross Cables. By help of Auto MDIX. Pins will be changed automatically.

5. POE Injector.

+V and -V = POE.
POE is power over Ethernet.

6. Skip

7. Types of NIC.

+ wired $\rightarrow$ Binary $\rightarrow$ Electrical signal

Electrical signal $\leftrightarrow$ Binary

+ wireless $\rightarrow$ Binary to Radio Frequency

Radio Frequency to Binary

Functions

	+T	-T	+R	-R
PC	1	2	3	6
Router	1	2	3	6
Switch	3	6	1	2
